

Corn Silage Burn Down Days

Bring your corn stalks to any of the locations listed on any, or all, of the dates scheduled. Bring samples between 10 am and 1 pm. Your Ag Partners representative will contact you with your specific results the following day.

CHECK YOUR 2023 CORN SILAGE MOISTURE WITH YOUR AG PARTNERS TEAM!

▶ Please cut 4-5 corn stalks at the chop height at which you plan to cut, from each field you want moisture analysis.

▶ Regional analysis results will be e-mailed 1-2 days after each burndown day. If you do not already receive Feed Mill Holiday Closure e-mails, check with your Ag Partners feed team to be added.
