

CORN SILAGE BURN DOWN DAYS

IT'S MOISTURE TESTING TIME! Drop off corn stalk samples for silage moisture testing on any, or all of the dates listed. If you need moisture testing outside of these dates, you may call your Ag Partners agronomist or nutritionist directly any time for testing.

Monday, September 8

ELLSWORTH FARM STORE

[290 North Morse Street](#) 

Thursday, September 4
Tuesday, September 9
Thursday, September 11
Tuesday, September 16

-  Cut 4-5 sample stalks from each field to be tested.
-  Samples should be cut the same height at which you plan to harvest.
-  Cobs should have fully dented kernels with a milk line.
-  Bring samples before 1pm on the day scheduled.
-  Regional analysis results will be e-mailed 1-2 days after each dry down day; your Ag Partners rep will contact you the following day with specific field results.
